## Projects

### Recipe App using JS API
- It is a web-based application designed to allow users to search and view various recipes. This app leverages a third-party recipe API (TheMealDB API) to fetch and display recipes based on user input

### E-commerce Website
- The website will showcase products, allow users to view categories, and provide a simple user experience
- Single page e-commerce website using only HTML, CSS, and a minimal amount of JavaScript.

### File Manager Application
- The app will focus on providing a simple and intuitive user interface with two main viewing options: Grid View and List View.

Design Tool: Figma

Methodology: Prototypes ensuring the smooth and intuitive user flow.
